**Old business:** The January fun fly went off very well if not very foggy. **Sunday's we need more members to attend the Ready Springs Field site.**

**New Business:** **It's that time again; time to renew your annual club dues.** Dues will be \$40 (as usual). You can pay **Steve Elsner** in person at Hook Field most Sundays. You can mail the money to **Steve** at the address shown on the web page or found in our organization chart.

The new web site is up and running thanks to **Richard Plummer**.

An open discussion was held regarding adding a 3<sup>rd</sup> float fly to club events in 2011. After much debate the idea was tabled to find out which other clubs may be holding a float fly to see if it is doable.

An open discussion was held with regards to adding pylon racing at Ready Springs on Sundays. **Harry** is going to look into the availability of inexpensive airframes for the racing.

**Safety Thought:** It was reported that an AMOS member got into the wrong end of a prop resulting in a 1/4" x 3" cut to the wrist. With a mind towards safety it would be best if all of us equipped our cars with some sort of a first aid kit. **Dick Brace** will inspect the club first aid kit at Hook Field to verify it is complete should we need to use it.

On a second issue, a gas plane went out of control at Hook field and it was suggested that there be 2 sources of killing a motor on gas planes.

**Dumb Thumb Award:** **Danny Weger** did receive the prestigious dumb thumb award for making the statement while walking to the flight line, "better look out guys, something not quite right with this plane", as he hand-launched the electric across the field. **Danny** said, "I couldn't get back to the elevator control quick enough", as the plane became a ground screw.

**Show and Tell:**

**There were no aircraft to show.**

**The 50/50 Drawing:** **Dick Brace** won \$4.00 bucks and said, "You guys are a bunch of cheap (insert your favorite dirty word here)".
